→ About this Course

Do you find the notion of 'Problem Solving' daunting? Have you been to too many problem-solving sessions that are overly rigorous, exhausting and unhelpful?

Now you can learn how to make Problem Solving practical, fun and fruitful. Problem Solving and Critical Thinking are among the most essential skills of the Digital 21st Century. They are key enablers to achieving Transformation, Innovation and Resilience.

Learn the agile way to solve problems quickly, by engaging the right people at the right time and in the right way. Rapidly formed, cross-functional problem-solving teams utilising Critical Thinking will work together expeditiously on crucial issues that are preventing them from doing their jobs efficiently and effectively for their organisation and its customers. Embracing Agile Problem Solving will help your organisation achieve rapid, sustainable performance improvement in whatever you do

What are the key takeaways I can readily apply?

Use the exclusive Agile Problem-Solving Canvas to swiftly solve problems in an iterative and collaborative way

Deliver great solutions to vexing problems by adopting a regular mindset and practice of Experimentation

Apply Critical Thinking to overcome our natural biases and get to the root cause of problems

See how anyone at any level can be a great Problem Solver

...and more.

→ Who is this course for

Aimed broadly at staff and professionals who are proactive in nature and wish to be on the leading edge of their personal and organisational journeys towards Excellence in the Digital Age

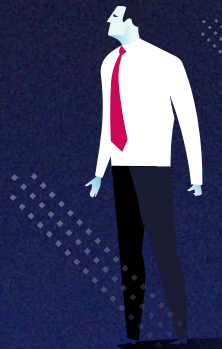

John Hamalian

John holds an MBA from Fordham University in New York and a Bachelor Degree in Engineering from Kettering University in Michigan.
